We are opposed to the construction of any more nuclear power plants. They do not provide cheap electricity and they do leak toxic materials into the environment thus affecting all forms of life. They both use and contaminate vast quantities of water, which would be better used for agriculture or left in situ. There is still no known way of safely disposing of the toxic wastes. Haven't General Electric's faulty designs caused enough damage already? The Palisades has recently been downgraded due to failure to address safety issues and the Besse Davis Plant is well known to be a danger from cracked cement in the casing. Also hasn't Lake Erie endured enough insult already.

Please abandon this project.

Thank you.

Anne and Peter Bray.
