My name is Gayle Bettega. As a member of the Sierra Club and DTE's Green Current's program, I am disappointed and shocked that DTE is even considering adding another nuclear power plant to an already dangerous situation. After witnessing the horrors of Fukushima, Three Mile Island and Chernobyl, why can't we learn? After paying extra to support DTE's Green Current's program, why aren't they moving more strongly into renewable energy? I resent that they are putting my health and the welfare of this region in jeopardy.

I understand that the cancer rate in Monroe has increased 30% since Fermi 1 and 2 have gone in. That is documented by the Center of Disease Control. Fermi 1 was a partial meltdown which is told in the book " We Almost Lost Detroit". I do not want to be a victim of their carelessness.

We have no permanent place to store radioactive waste. Until we find such a place it should not even be considered.

After Fukushima, when other countries such as Germany, "got it", and are moving away from nuclear, we, like fools, keep our heads in the sand. I understand that Fermi 2 is the same design as Fukushima.

I do not have to be a scientist to realize that nuclear power and nuclear arms could be the way the world ends. Please, for the welfare of the people in southeastern Michigan, reject this dangerous proposal.
